Status: Deployed
Platform: Sunos and Solaris
Compiler: C++
Other Tools: Purify and Sniff

Buying Criteria

None of the staff who are still on the project were involved in the decision to buy Objectivity.
[Ed: Platform, C++ and branched versioning support.]

Why Objectivity

Versioning features/MROW

Product Description

The ATOZ group has developed an in-house source code management system which utilizes branch-versioning and distribution to make a C++ development environment available to a team of 250 users.

There are approximately 15 databases in the federation, totaling about 6 gigabytes of data. It is using Objectivity 3.5. They hope to upgrade to a more current version of Objy soon.
