# Objectivity Case History

## Customer Information

Customer:            University of Texas-Dallas
Industry:            High Energy Physics
Application Domain:  Data Analysis
Status:              Deployed
Platform:            Sun, HP
Compiler:            Solaris, HP
Other Tools:         SQL

Supporting Natural Science and Math Dept. 3 professors and about 8 grad students. Original exposure to Objectivity thru SLAC connections and Objectivity usage, but there may be the potential for additional usage in other areas such as tape volume management. Don was also very interested in the HPSS interface and how that could benefit their operations.

## Buying Criteria

Java Interface-  If any new tool development would be done, it would most likely be done in Java.

SQL Interface- Having a SQL interface for ad-hoc reporting was a big plus.

## Why Objectivity

De Facto Standard in High Energy Physics - Close interaction with SLAC personnel on the project.
