

Objectivity Case History

Customer Information

Customer: University of Oklahoma
Industry: Academic
Application Domain: Research/Teaching
Status: Instruction
Platform: NT
Compiler: Visual C++
Other Tools:

Objectivity is used to teach students the principles of object-oriented databases.

Buying Criteria

True Object-oriented database: Since the purpose was to instruct students on ODB's, object-relational and relational systems were not considered.

Price: With limited academic budget for software, pricing was a big issue. Objectivity's academic and research licensing was a big plus.

Why Objectivity

Flexibility: They needed the flexibility to experiment with different application architectures. Objectivity gave the most flexibility in building client/server, or n-tier systems.
